

Reranking

The screenshot shows a web browser at localhost:3004 with a search interface. At the top, there are tabs for 'Text', 'Image', 'Multilingual', 'Audio', and 'Video'. The 'Text' tab is selected. Below the tabs is a 'Text query' input field containing 'Eiffel tower'. A 'Show filters & options' link is visible. A 'Search' button is present. Below the search bar, a 'Query usage' bar shows 'Prompt: 6 · Total: 6'. The search results are displayed as a list of three items, each with a 'TEXT' label, a score, and a 'reranked' button. The first result has a score of 0.906 and describes the Eiffel Tower. The second result has a score of 0.664 and describes the Eiffel Tower landmark. The third result has a score of 0.053 and is labeled 'test'. Each result has a 'Summarize' button. At the bottom, there is a 'Results per page' dropdown set to 3, and navigation links for 'Prev', 'Page 1 of 3', and 'Next'.

Deduplication:

The screenshot shows the 'Ingestion' interface with a dark theme. At the top, there is a header 'Ingestion' with a sub-header 'Add content to the shared vector store'. Below the header are tabs for 'Text', 'Image', 'Multilingual', 'Audio', and 'Video'. The 'Multilingual' tab is selected. The 'Text (any language)' input field contains the text '海滩上美丽的日落 / Any language...'. Below the input field is a 'Language override (ISO 639-1, optional)' dropdown menu set to 'auto-detect'. Below the dropdown menu is a note: 'Encoding: UTF-8 (browser default) · leave language blank to auto-detect server-side'. A green button labeled 'Ingest Multilingual Text' is present. Below the button, a green message box displays the following text: 'Ingested successfully — id: 6a9adf1b2f54e81ccd873389, category: multilingual. Note: identical content already exists (id: 6a9add8b2f54e81ccd873388)'. At the bottom, a 'Token usage' bar shows 'Prompt: 45 · Total: 45'.

Okay, I'm here. I'm going to run the daily stand-up meeting today. Uh, we can get started. Morning, Hari. Morning, Sindhu. Um, Radhakrishnan here. So yesterday I've been assigned with a couple of tickets related to balance transfer. So I have written manual test cases initially for that and got it signed off from the BA and PO in our team. And since the latest build is now available in QA, I've started testing those scenarios and monitoring how the system behaves for the different scenarios. So far, the system is good, and there are no any defects. And if there are any, I will raise it accordingly. And once the execution is done, I'll focus on converting those steps into automation scripts and see how it goes. So that's the update from my side. Thanks. Thank you, Radhakrishnan. Good morning, everyone, Sindhu here. Yesterday I've completed smoke and regression testing for the payments module and logged three defects in Jira. And today I will be continuing manual testing for the reports module and automating the transaction history flow in Selenium. And no... and there's no blockers so far and waiting for a new build to proceed with revalidation. So that's all for my update. Thank you. Okay, thank you, Sindhu. Thank
