Quelle est son objectif, et quels sont les endpoints et les méthodes de requête disponibles ? Cela m'aiderait à vous fournir des explications plus précises et ciblées.\n\nEn général, pour utiliser une API, vous aurez besoin de :\n\n1. Authentifier vos requêtes : cela peut se faire

AI

API Testing Assistance

Help me test an API I'm working with.

I'd be happy to help you test an API! To get started, I have a few questions:

1. What API are you working with? (e.g., a REST API you've built, a third-party API, etc.)

2. What would you like to test? For example:

Send a request and inspect the response

Write automated test scripts to validate responses

Test multiple endpoints in a sequence

Set up a monitor to run tests on a schedule

3. Do you have the API details handy? (URL/endpoint, authentication method, request body, etc.)

Let me know and I'll take it from there!

Describe what you need. Press @ for context, / for Skills.
